About the Company

PETROGAS ENERGY SOLUCIONES S.A.C. is a Peru-based commercial and technical platform focused on the distribution of industrial valves and related equipment for demanding energy-sector applications. The company supports clients that require reliable supply, technical coordination and procurement execution across Latin America.

Corporate Snapshot

Company	PETROGAS ENERGY SOLUCIONES S.A.C.
Experience	2 years supporting energy-sector opportunities and technical procurement processes.
Core Markets	Peru, Colombia and Venezuela, with broader commercial coverage in Chile, Ecuador, Argentina and Brazil.
Business Focus	Industrial valves, safety valves, breather valves, flame arresters, forged components, engineering consulting and procurement for oil & gas projects.

Strategic Role

Technical Commercial Bridge	The company connects regional industrial demand with specialized valve and equipment solutions, helping clients structure requirements, coordinate technical documentation and move procurement opportunities forward.
Regional Energy Focus	Petrogas Energy serves clients and commercial opportunities across Latin American markets where operational continuity, pressure safety, flow control and reliable sourcing are essential.

Positioning

A premium Latin American valve distributor combining market proximity, technical coordination and procurement discipline.

Our Mission	At Petrogas Energy Soluciones, our mission is to become a trusted strategic partner for clients who require quality, efficiency, and operational continuity in demanding industrial environments.
Our Vision	To become a leading supplier of products and services for pipelines and industrial facilities, serving local, regional, and international markets with reliability, quality, and efficiency.

Value Promise

01	Technical alignment before commercial closure
02	Procurement support for regional energy projects
03	Portfolio focused on critical industrial applications
04	Commercial bridge across Latin American markets

Products & Services

Industrial Valves	Flow-control equipment for oil & gas, petrochemical, mining, chemical and industrial process applications.
Safety Valves	Solutions for pressure protection and critical safety systems where operational integrity is essential.
Breather Valves / Flame Arresters	Equipment for tank protection, vapor control and flame propagation mitigation in industrial facilities.
Forged Components	Forged materials and components for demanding valve applications, including parts used in critical assemblies.
Engineering / Technical Consulting	Technical review, project support, specification coordination and documentation alignment with client requirements.
Procurement for Oil & Gas Projects	Sourcing, supplier coordination and commercial follow-up for equipment packages and project opportunities.

Industries Served

Petrogas Energy supports clients in energy and process sectors where equipment reliability, safety and technical traceability matter.

Oil & Gas	Upstream, midstream and downstream requirements, including project procurement and technical support.
Petrochemical	Valve and safety-related equipment for demanding plant environments and process systems.
Mining	Industrial flow-control equipment for auxiliary systems, processing areas and project packages.
Chemical & Industrial Process	Supply and technical coordination for pressure, flow and safety-related equipment.

Market Coverage

Core experience	Peru Colombia Venezuela
Regional coverage	Chile Ecuador Argentina Brazil

Commercial & Technical Workflow

1. Requirement Review	Initial review of the client request, application, operating conditions and target delivery scope.
2. Technical Coordination	Alignment of specifications, drawings, datasheets, standards and supplier documentation when applicable.
3. Commercial Proposal	Preparation of a structured offer with product scope, commercial terms, delivery basis and procurement assumptions.
4. Procurement Follow-up	Supplier coordination, order tracking, documentation control and client communication through execution.

Why Petrogas Energy

Focused portfolio	A clear product line for critical industrial valve and safety applications.
Regional perspective	Commercial coverage designed for Latin American energy-sector demand.
Technical discipline	Emphasis on specifications, documentation and operational relevance before closing a supply commitment.

Let us support your next project.

Reliable valve solutions for energy, pipeline and industrial facilities across Latin America.
